

Timp Woodturners Association  
Meeting Minutes  
10 March 2010

The meeting was convened by Stuart Davey at 7:00 pm with 44 persons present. President Kirk DeHeer was en route to Virginia on woodturning business.

Stuart informed the members that investigation of the purchase of a sound system is ongoing. The Utah Symposium is preparing to purchase two systems for themselves in addition to the system we intend to purchase and lend to the Symposium for the week of the Symposium each year. We hope to piggy-back with the Utah Symposium purchase in order to get a better price on the group purchase.

Stuart also reported that the benefit auction Brad Dew invited us to participate in to aid a distressed family was very successful. A total of \$80,000 was raised to help the family.

Stuart announced that SCERA has requested our participation in their summer youth turning program again this year and asked for volunteers to assist in teaching. Beth Denner and Dale Dallon are the only volunteers identified thus far.

Mike Hyer presented an interesting discussion on the growth process and characteristics of wood and then demonstrated his method of turning a small square-edge bowl. Demonstration notes will be posted on the club website in the near future. Mike Pryzbyla operated the video camera and Russ Bateman took still photos.

Stuart Davey conducted the show-and-tell segment of the meeting. Work was presented by Robert Anderson, David Anthony, Leonard Cleveland, Dale Dallon, Beth Denner, Mike Hill, Lynn Jacobsen, John Kartchner, Lane Phillips, Doug Stout, and Dorian Topham. We thank all who brought in their work to share.

Robert Anderson conducted the wood exchange.

The meeting adjourned at 9:00 pm.

Respectfully submitted,

Dale S. Dallon  
Secretary/Treasurer
